

GANNON UNIVERSITY'S INSTITUTE FOR HEALTH AND CYBER KNOWLEDGE

DESIGN. INTEGRATE. PROTECT.

I-HACK is a cutting-edge facility designed to integrate academic learning and professional development with collaborative businesses to provide real-world experience that meets the demands of the cyber industry. It is tailored to support and grow businesses through a variety of resources available in intentionally designed spaces including:

PIERRE MCCORMICK CYBER LEARNING CENTER

As the central source of academics in I-HACK, students and faculty come together to use cutting-edge technology and systems-thinking approaches to solve problems facing today's industry.

- Sophisticated labs with industry-standard technology
- IoT research and development
- Simulated cyber attack assessment and defense
- Experienced faculty and staff experts

THE HATCHERY

This collaborative innovation space integrates industry and professional development with academic creativity and learning through lab spaces, technology and commercial space where new ideas are brought to life.

- 3D printers, laser scanners and soldering tools for rapid prototyping
- Geospatial mapping and super-computing facility
- Workforce training and development
- Student internship and employment support

CENTER FOR MANUFACTURING & TECHNOLOGY

The sixth floor of I-HACK will provide hands-on opportunities with 3D printing, metal fabrication, wood-working and electronics assembly. Students and community partners will advance traditional manufacturing into a new age of technology with expertise in:

- additive manufacturing
- cyber engineering
- cybersecurity
- assembly, remanufacturing and integrated circuit fabrication
- analytics and management

TRANSFORMING ERIE TOGETHER

I-HACK serves as a beacon in downtown Erie for academic, industry and small business owners whose mission is to educate, collaborate and innovate in cybernetic ventures in health care and related industries.

OUR LOCATION

Located in Erie, Pa., Gannon University's Institute for Health and Cyber Knowledge is just a short drive from major cities such as Buffalo, Pittsburgh and Cleveland. This prime location is ideal for businesses seeking a central location to create wide-reaching, regional impact through professional training and development opportunities.

Gannon University has been a trusted and reliable community partner committed to the advancement of the region's economy for nearly 100 years. As a partner at I-HACK, you will become part of Gannon's dedicated and stable network and gain access to opportunities with faculty experts and students who are transforming to rising professionals across a wide variety of industries.

OUR COMMUNITY IMPACT

I-HACK creates a significant regional impact as a multipurpose facility that brings together cyber education and professional training and development.

- 15-20 new businesses
- 150-200 new jobs
- Workforce of 100 innovation professionals
- \$2.5+ million annual Erie economic impact
- Up to \$15 million Erie capital disbursement
